

Let's get to work.

Over 300 construction workers will take about 18 months to complete the project at a total cost of \$214 million. When completed in late 2005, the Slocan-LP OSB mill will be one of the largest in the world.

The Slocan-LP OSB mill will result in the creation of 120 new full-time jobs in Fort St. John once production begins.

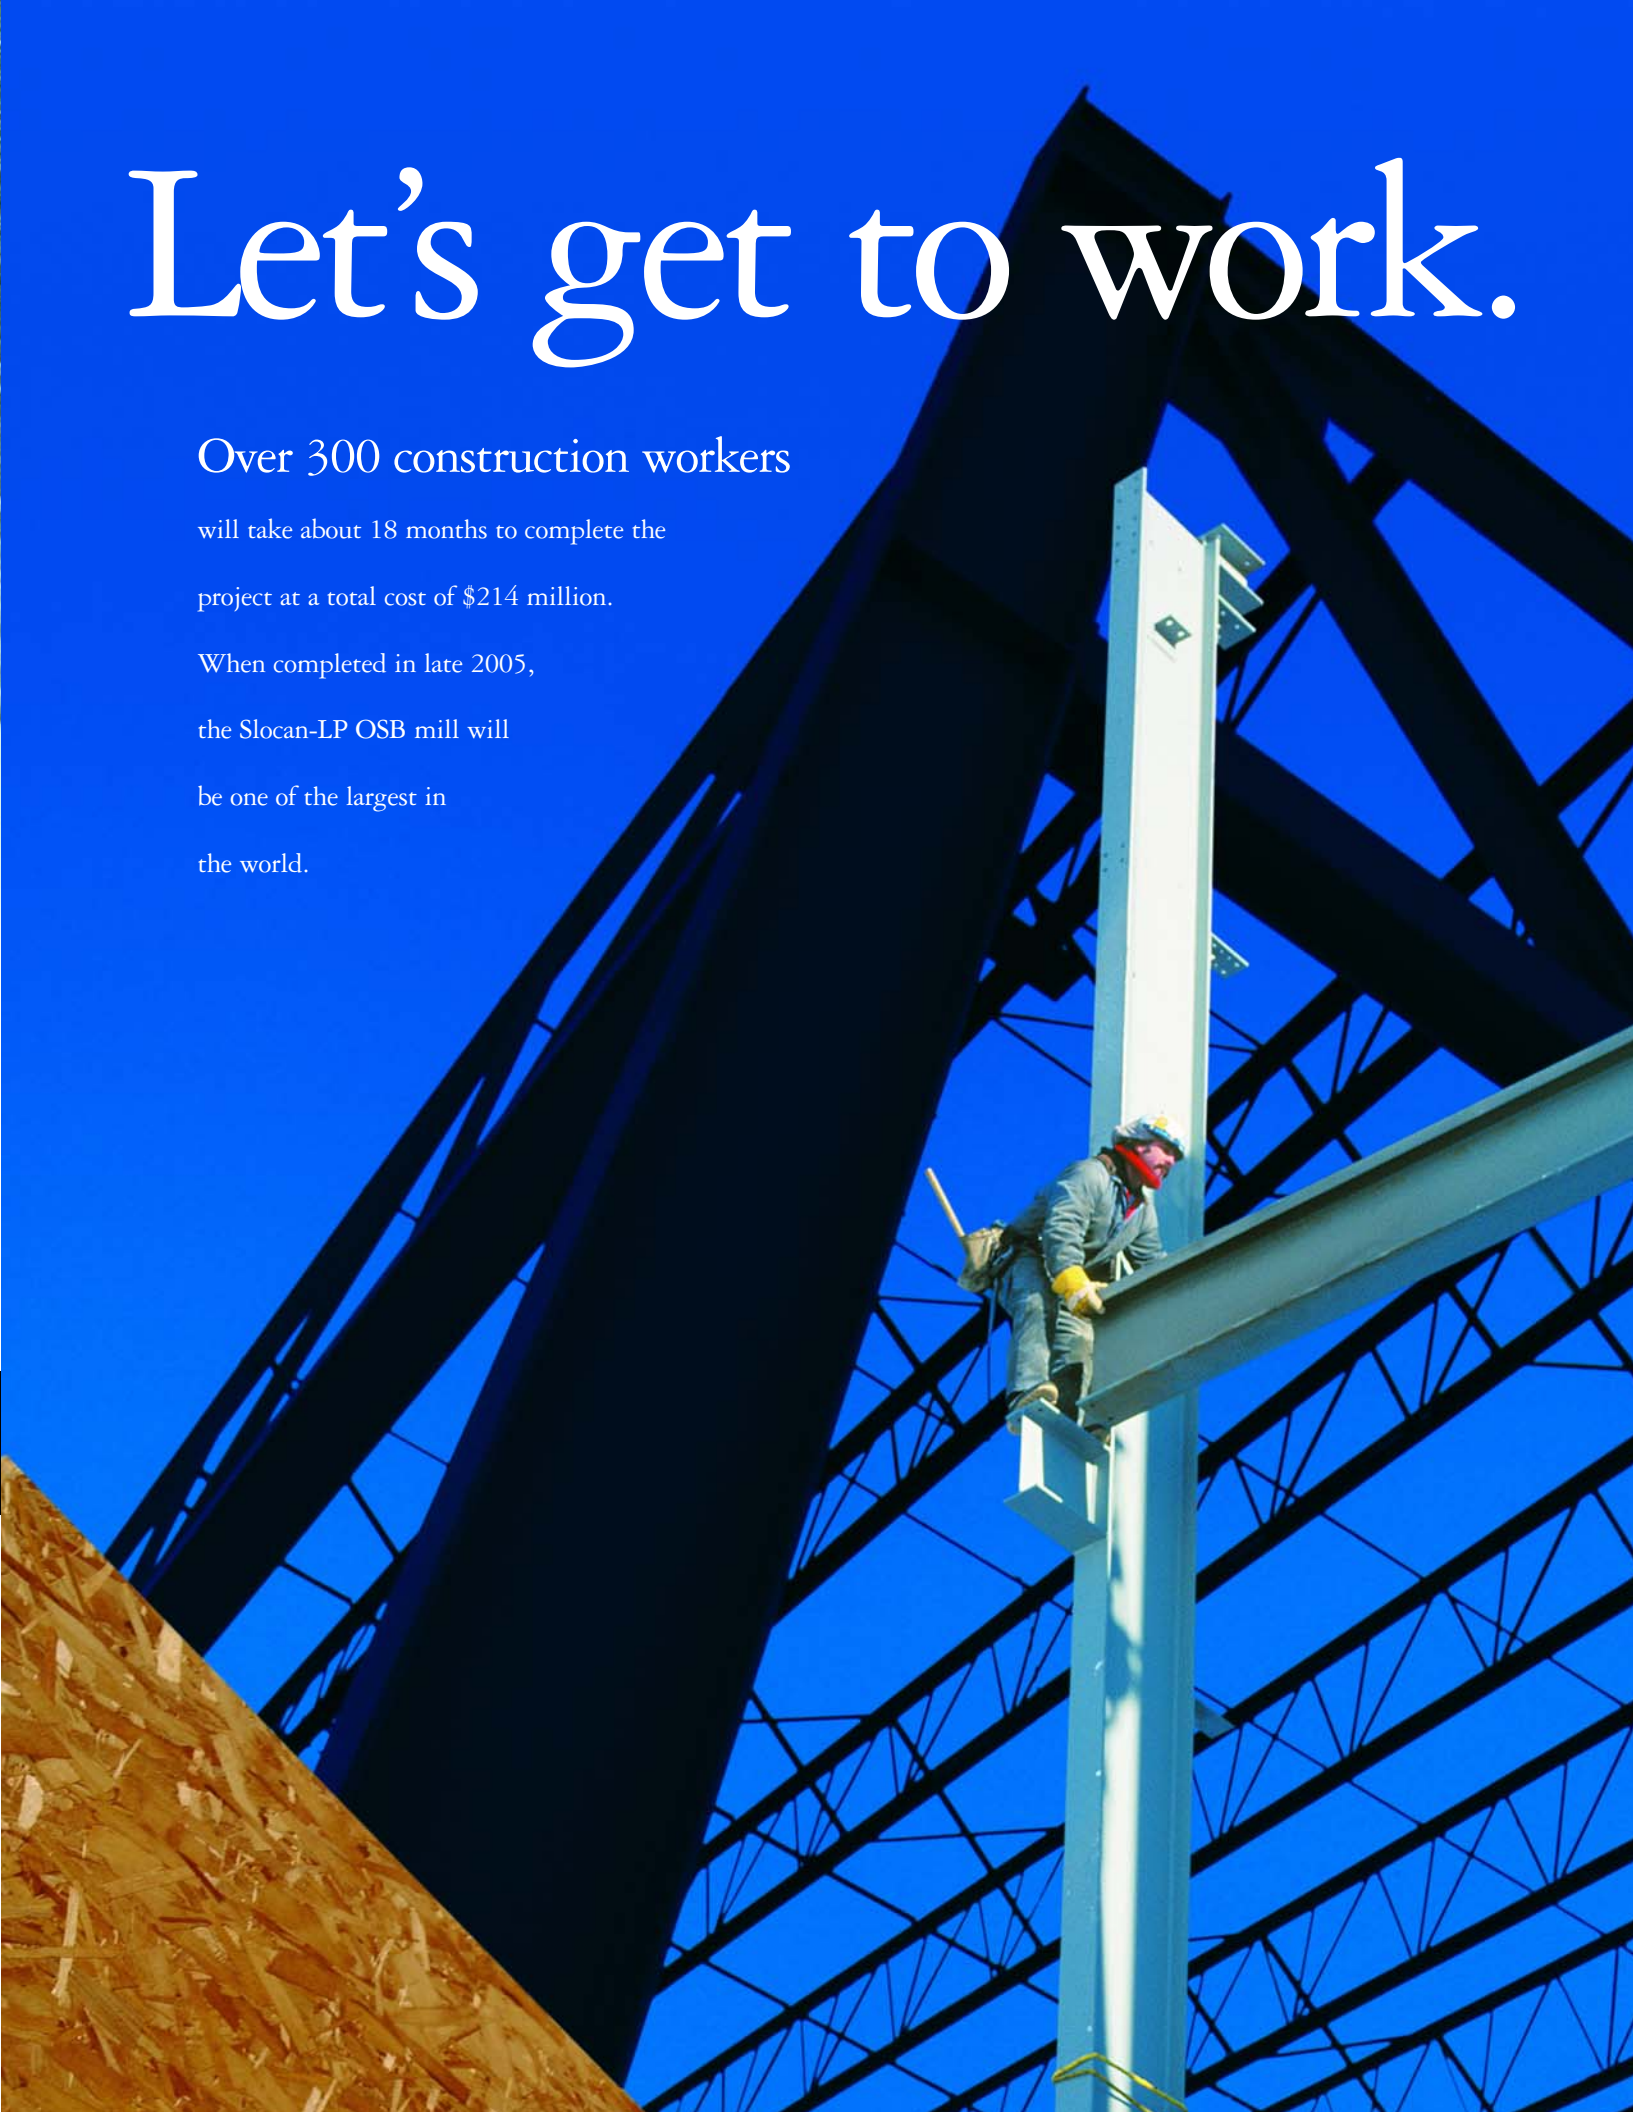

Our customers demand the best quality products we can deliver and we will deliver by using the best people in the industry to produce those products.

Please give us a call if you would like more information.

Slocan-LP OSB

chose Fort St. John as the home for its new OSB mill because the people of the community and the surrounding area demonstrated their support for the project from the start and made Slocan-LP OSB feel welcome. Council and city staff demonstrated what partnership means in the North Peace. What made the choice of location even easier was the “Energetic City” pride!

The Boreal mixedwood forests of the North Peace

have sustained the people and wildlife of the region for generations.

Slocan-LP OSB recognized the special relationship between the forests and people of the North Peace from the beginning. The 300 people that will work in our woodlands operations will use the best forest practices available in sustainably managing the forests that will supply the mill.
